

NonwovensBid

RFQ & B2B EXCHANGE

Nonwoven cutting machine.

For our client we need an automatic machine that can cut **rolls to sheets** of different dimensions.

The machine should cut just the length of the material. Rolls will be fixed width.

For exaple: Rolls width 1m or 1.6m or 2.5m width should be cut to length from 5cm to 3m length.

Width of cutting machine should be: 2.5m.

Length of cutting: from 5cm to 3lm.

Possible to load multiple rolls, multiple layers of nonwovens.

Thickness of material from 0.1mm (one layer) to thickness 10cm (multype layers)
