

NonwovensBid

RFQ & B2B EXCHANGE

1. Polyethylene non-woven fabric, 40–50 g/m² (likely spunbond/thermobond; not specified)

Q: Annual volume: approx. 500,000 m²/year (subject to success)

2. PA non-woven fabric, 70–80 g/m² (thickness: approx. 400 µm)

Q: Annual volume: 26,000–27,000 up to 50,000–60,000 m²/year (subject to success; increasing from approx. 20,000 m² in the first year)

Demands : Air permeability: approx. 450–500 l/m²/s; alternatively, please propose what can be offered for this basis weight and thickness.

Please provide a quotation that meets the desired technical specifications.

Width of rolls is 150cm. Length Jumbo rolls.

Location : EU
